

ONKAR SHINDE

Electronics and Computer Engineering

Jalna, Maharashtra 431207 | +91 8010043421 | shinde80100@gmail.com

LinkedIn: <https://www.linkedin.com/in/onkar-shinde-7720b1314>

Professional Summary

Entry-level Cloud Computing professional with strong fundamentals in Linux, cloud platforms, networking, and programming using Java and Python. Familiar with cloud infrastructure, automation, and basic DevOps tools, and eager to learn and grow in cloud and DevOps roles.

Education

B.Tech: Electronics and Computer Engineering Expected 05/2026

Shivaji Vidhyalay Hatadi – Partur, India

- Awarded Merit Certificate for Academic Excellence for consistent performance
- Member of Electronics & Computer Engineering Student Association (ECESA)
- CGPA: 8.10 • Ranked 1% in Class
- Sport Executive – ECESA (2024–2025)
- Captain – MIT College Kabaddi Team (2023–2026)

Skills

Cloud: IaaS/PaaS/SaaS, AWS/Azure/GCP, EC2/VMs, S3, IAM, VPC, security, RDS, monitoring, scalability

Linux: OS basics, CLI, permissions, users, processes, packages, shell scripting, cron, logs

Programming: Core Java (OOP, JDBC), Python (scripting, automation)

Networking: TCP/IP, OSI, IP subnetting, DNS, HTTP/HTTPS, VPN, firewalls, load balancing

Databases: SQL, MySQL, PostgreSQL, cloud databases

DevOps: Git, Docker, CI/CD, Terraform / CloudFormation (basic)

OS & Soft Skills: Linux, Windows, problem-solving, teamwork

Experience

Intern – Mentore Solution, Pune, India (03/2025 – Current)

Volunteer – College Event, Chhatrapati Sambhajinagar (02/2024 – 02/2026)

Languages

English – Bilingual or Proficient (C2) | Marathi – Bilingual or Proficient (C2)

Hindi – Bilingual or Proficient (C2) | Japanese – Intermediate (B1)

Certifications

- Python for Data Science – Coursera (05/2023)
- Cloud Computing Fundamentals – AWS Academy (08/2023)
- Machine Learning Basics – Coursera (06/2024)
- Python Project: Hospital Management IIT (09/2025)
- Multicloud Networking Associate Certification Avitrix (01/2026)

Hobbies and Interests

Learning cloud & DevOps technologies, Linux practice and automation, coding and problem-solving

Projects

- Three-Tier Web Application Architecture Implementation
- Cloud Static Web Hosting in AWS
- Secure File Storage Management System in AWS
- Smart Backup Automation System in AWS
- Server Health Monitoring System in AWS
- Student Management Web Application using 2-Tier Architecture on AWS
